

**EVERYONE  
WINS WITH  
FUSION WRAP**

Its so easy to change the style!

**VYNCO** **FUSION**

# EVERYONE WINS WITH **FUSION WRAP**

## THE SWITCHGEAR RANGE WITH ENDLESS POSSIBILITIES!

Fusion Wrap provides multiple upgrade options, by simply swapping the face plate.

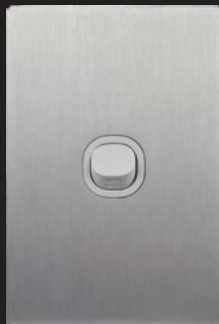

FUSION WHITE

FUSION SAND

FUSION STONE

FUSION METAL

CUSTOM PAINTING

# IT'S ALL ABOUT THE **BASE.**

All face plates in the Vynco Fusion range fit the same base plate, just clip off and on as you please. Just like a test paint pot or fabric swatch, you can test a different look in each room before you commit to a whole house. If none of the standard Fusion Face Plates suit the colour scheme of the room, the end user has the option to custom paint to order.

# HOW DOES FUSION BENEFIT THE HOME OWNER?

- **THE HOME OWNER** can have various Fusion styles in various rooms
- The value of each different product can be considered and where the budget is best spent (i.e. Wrap might be for bedrooms, and Fusion Metal might be used in the kitchen).
- These considerations can be made without any delay in the building process.
- The home owner does not have to decide which Fusion finish to use, before the commencement of the painting process. This decision can be made after a colour scheme has already been applied to the walls to see what looks the best.
- At any stage in the future of the home, the home owner can change finish! Fusion switchgear can be easily changed to keep up to date with changing interior design trends, or to meet the needs of a new owner of the home when it is sold.
- Fusion also offers the unique custom painting option, where the home owner/interior designer is not limited by standard ranges.
- This feature can be used to camouflage the switch into a wall or make it stand out as a design feature in its own right.

# HOW DOES FUSION BENEFIT THE **CONTRACTOR?**

- **THE CONTRACTOR** only needs to stock one range to cover a basic house-lot fit-out, and also has multiple upgrade options in the form of other Fusion Face Plates.
- Traditionally, contractors had to clutter up their vans with multiple ranges of high and low end options. Now, an electrician can stock only Wrap, plus a couple of other Fusion Face Plates as upgrade options.
- There does not need to be a delay in the initial fit-out, since Fusion allows the customer to make decisions on the finish they want later on down the track. The contractor can go through and install the Wrap, and change the face plates later.
- Fusion also allows the contractor the freedom to up-sell different Fusion finishes at a later date, any number of years after.

# HOW DOES FUSION BENEFIT THE **BUILDER?**

- **THE BUILDER** now has the ability to pitch a switchgear finish according to the type of build, i.e. Wrap throughout for a entry level home, Fusion White for a mid-range build, and Fusion Metal, or custom painting for a high end house.
- There is also the option to customise room by room, but, again, there is no reason for a delay in the Fusion Wrap installation, while the home owner decides on their desired look.

# HOW DOES FUSION BENEFIT THE WHOLESALE?

- **THE WHOLESALE** can reduce its stock on the shelf, without reducing up-sell options. The different Fusion Face Plates, for upgrading from Wrap, can either be held on the shelf or ordered overnight.
- The Vynco switch mechs and other specialty modules are common across all Vynco switchgear ranges, which is convenient if the branch wishes to stock other product ranges.
