and are subject to change.

Vynco Industries (NZ) Limited began in 1990, bringing innovative NZ designed, developed, and manufactured electrical products to the New Zealand market. 100% owned by the Vale family, Vynco today employs over 100 employees nationwide - with offices across Auckland, Christchurch and Wellington.

Focusing on research and development, Vynco's 15-strong Product Development team creates and develops products that challenge traditional ideas. Based in Christchurch, the Product Development team work with the brightest talent from New Zealand universities to develop local skill and provide opportunities to future engineers. Our in-house Quality & Compliance team ensures our products are checked and tested to a high standard and our product is supported throughout its lifetime.

The R&D logo throughout this book represents products that have been Researched & Developed by Vynco's in-house team.

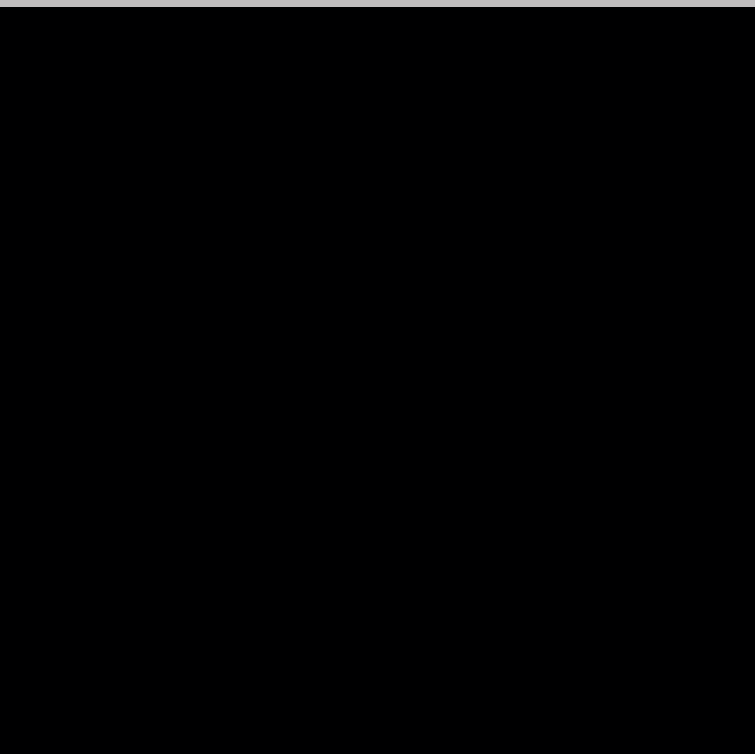

R&DTM

Vynco's NZ-based manufacturing facilities offer a variety of customisation options. Utilising in-house manufacturing and local suppliers allows Vynco to accommodate changes in local regulations with efficiency and ease and gives us the ability to adapt and customise to meet the ever-evolving needs of the industry, the electrician and end-user. We are proudly part of the manufacturing community, keeping jobs within NZ.

Sustainability is a key value underpinning Vynco's operation and we strive to reduce the amount of waste created by the New Zealand construction and electrical markets. Through our introduction of moulded fibre product packaging, digitalisation, operational changes, local manufacturing and constant design improvements, Vynco is leading the industry in creating a more environmentally-friendly future.

METRO SWITCHGEAR

NEW

Vynco Metro incorporates the homeowner's need for aesthetics and functionality, with a elegant slim, curved satin fascia.

Now available in black or white, Metro is compatible with all standard Vynco mechs, creating a versatile addition to your switchgear offering.

By offering a refreshed contemporary feel, this is a sophisticated step up from basic switchgear ranges.

Smooth Curves

Slim 6.5mm* profile

*The double horizontal with extra switch/USB has an 8.5mm profile.

LOPEZ DOWNLIGHTS

We've taken our Jolie downlight and made it slimmer to fit in those tight roof spaces.

With a depth of just 47mm, the new Lopez fits perfectly under a ceiling truss.

Easy to install with quick connect terminals, or flex & plug (LOPEZF), the range has 3 colour settings, is dimmable and a 100° beam angle.

The Lopez downlights are safe to use around insulation with IP54, IC-F and IC-4 ratings, and is perfect for a wide range of applications.

FOLEY EXTERNAL COWL GRILLES

The Foley Grille offers a modern, unobtrusive alternative to traditional plastic exterior cowls. With a robust aluminium body, powdercoated in one of three standard colours, the grille will not discolour with exposure to UV light.

Personalisation is available with custom powdercoat colour options.

- Custom powdercoat colour options
- Airflow tested
- Sound tested to ISO7235 & ISO3741 standards
- Minimum 15 year lifetime to match requirements of other cladding components as defined in the NZBC B2
- Designed, manufactured and tested at our Christchurch facility

VMC ONE

Our new VMC ONE range combines the best of both worlds, replacing our VM Series shallow and deep combined meterboards with a single board. Housed in a shallow board frame, VMC ONE boards all include a raised clear window, which allows deep single phase meters to be installed. The VMC ONE range will be available in the existing 34 and 51 way options as well as a brand new 17 way option.

DSN201E RCBO SERIES

The new DSN201E series is a 1P+N electronic RCBO in one-module width for the protection of end user single-phase circuits against overload and short-circuit currents.

- Compact eRCBO 1P+N in 1M width for DIN rail applications
- Easy installation with supply possible from either end
- Rated current up to 32 A with C tripping characteristics
- 10 kA breaking capacity available up to 20 A
- Busbars available

AFDD with integrated MCB includes protection against overcurrent

AFDD with integrated RCBO includes protection against overcurrent and current leakage to earth

Reduces downtime with easy troubleshooting via LED monitoring

Compatible with System Pro M Compact® Accessories

ARC FAULT DETECTION DEVICES

Reduce the risk of fire by using Arc Fault Detection Devices (AFDD) to protect against earth arc faults, parallel arc faults, and series arc faults.

Recommended for:

- Home and Daycare Centres
- Retirement Homes
- Hotels
- Hospitals
- Gas Stations
- Skyscrapers
- Museums
- R&D Centres and Laboratories

Easy MCB-mount sensors saves up to 30% of installation time

Easy retrofit and upgrade

Minimum space requirements due to ultra-compact sensors

One sensor for all currents DC, AC, or mixed (up to 160A)

CIRCUIT MONITORING SYSTEM

The CMS is an ultra-compact and high-performance multichannel measurement system for AC and DC branch monitoring.

It is a complete solution for monitoring electrical parameters in distribution panels, enabling power monitoring and energy efficiency analysis in buildings and critical power applications.

Use with ABB Digital Timers.

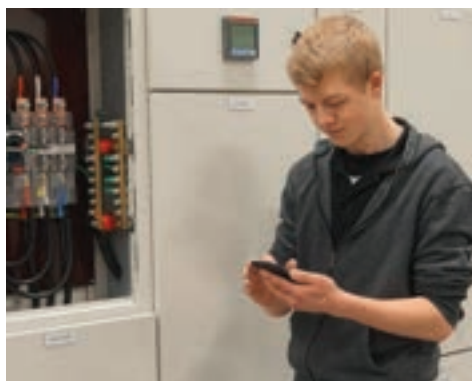

Save up to 80% of commissioning time.

EASY PROGRAMMING WITH THE ABB DBT TIMER APP

Use the DBT Timer app to create new programs, manually control the relay output(s), activate the random and cyclic function, view parameters, and transfer programs from one device to another.

Update programming remotely.

Download the **DBT Timer** app via the Apple Store or Google Play.

CIRCUIT PROTECTION

GEOS LANDSCAPE BOXES

Our recently introduced landscape enclosures provide design flexibility for installation in exposed outside areas.

Built using glass-fibre reinforced polycarbonate, these electrical landscape enclosures offer strong weather protection, concealment, and durability to ensure the reliability of outdoor electrical installations. All too while blending seamlessly with their surroundings.

NEW

Key Features:

- Industrial quality IK09, IP66
- Transparent door
- Twist lock with 3mm double-bit insert

VYNCO

ONBOARD PROGRAMME

Vynco has a long history designing and manufacturing switchboard systems, ranging from complex 4000A switchboards to smaller residential units.

The team is comprised of specialist engineers who have developed a range of switchboards that will suit most mid-range applications. This range reduces the need for custom designing and quoting, reducing the wait time for customers.

SABRE - TEMPORARY SITE LIGHTING

IK08

IP65

230 to 240V AC

Outdoor Suitable

LED's provide reliable high light output

Order Code	Connection	Wattage	Lumen Output	No. of Lights	Cord Length	Price excl. GST	
NOMADL10C2A	10A, 3 Flat Pin Plug and Connector	Single Fitting - 9W Chain of 2 - 18W	1300lm per lamp	2	2.5m	\$241.88	Carton Qty: Box Qty: 1
NOMADL10	16A, 3 Round Pin Plug and Connector	Single Fitting - 9W Chain of 10 - 90W	1300lm per lamp	10	2.5m	\$900.00	
NOMADL10A	10A, 3 Flat Pin Plug and Connector	Single Fitting - 9W Chain of 10 - 90W	1300lm per lamp	10	2.5m	\$839.90	

Complies with AS/NZS 60598.1 & AS/NZS 60598.2.20
Plug and inter-connection options available.

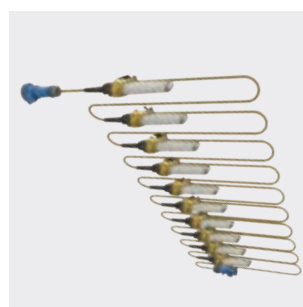

FEATURES

Designed and engineered in NZ

Robust design suitable for use on building and construction sites

Up to 60x lights

**Australian
New Zealand
Standards**

Compliant to
AS/NZS 60598.1 &
AS/NZS 60598.2.20

IK RATING GUIDE

IK Rating shows protection against mechanical impact.

IK00	IK01-05	IK06	IK07	IK08	IK09	IK10
Non-protected	 Protects against <1 joule impacts	 Protects against 1 joule impacts	 Protects against 2 joule impacts	 Protects against 5 joule impacts	 Protects against 10 joule impacts	 Protects against 20 joule impacts

IP RATING GUIDE

The IP Rating is a standard that classifies the level of protection provided against the intrusion of solid objects including dust, accidental contact, and water (as defined by International Standard IEC 60529).

The rating is expressed as 'IP' (Ingress Protection), followed by two numbers.

- The first digit shows the extent to which the equipment is protected against particles, or to which persons are protected from enclosed hazards
- The second digit indicates the extent of protection against water

First No.	Protection against ingress of solid objects	
X	Not tested	
0	Non-protected	
1	Protected against solid objects larger than 50mm	
2	Protected against solid objects larger than 12.5mm	
3	Protected against solid objects larger than 2.5mm	
4	Protected against solid objects larger than 1.0mm	
5	Dust-protected	
6	Dust-tight protected	

Second No.	Protection against ingress of water	
X	Not tested	
0	Non-protected	
1	Protected against vertically falling water drops	
2	Protected against vertically falling water drops when enclosure tilted up to 15°	
3	Protected against spraying water facing as a spray at any angle up to 60° from vertical	
4	Protected against splashing water from any direction	
5	Protected against water jets	
6	Protected against powerful water jets	
7	Protected against the effects of immersion between 15cm and 1m deep for 30min	
8	Protected against the effects of continuous immersion under pressure	
9	High pressure and temperature water jets

Summary	A tough weatherproof cabinet for aggressive environments that can withstand outdoor exposure for a minimum of 20 years.	A tough weatherproof cabinet for aggressive environments that can withstand outdoor exposure for a minimum of 20 years. The depth of the cabinet can be increased by 320mm increments without altering the height or width.	A tough weatherproof cabinet for aggressive environments that can withstand outdoor exposure for a minimum of 20 years. Used on roadsides by Telecom and traffic signalling companies.	A tough weatherproof cabinet for aggressive environments.	Used for cable terminations electronics and multiple applications.	A tough weatherproof cabinet for aggressive environments. Specialist applications where water, chemicals or food are present.	A tough weatherproof cabinet for aggressive environments. Made of marine grade aluminium for corrosion resistance
